

② + ①

- inventory of what's there (not what is not there)

- make lots of photo's for future reference (taxon level)

- teaming up: horticulturist + administrator

- barcodes / QR codes: inventory of labels (not plants)

- status not found is useful

- do small areas at a time (no ~~back~~ backlog)

↑

go for manageable size (up to 200...?)

tasks vs inspections

③+④ BULBS

- Need items
- Inventory when replanting
- Barcodes

The one who has the label
has the responsibility. for inventory.
Barcodes for bulls!

Inventory in winter

Determination in collaboration, curators
responsibility.

WORK FLOW

5 + 6

- General: Curator deal with the access.
Horticulturist deal with item ^{level} level
- The one moving the plant / find it has been moved, should record it.
- Curator should be resp. for checking correct ~~taxon~~ taxon
- depending on size of garden /
Knowledge of staff / time limit
- TASK MANAGEMENT FOR ANNUAL MOVEMENTS
