What is IrisBG?

IrisBG
Botanical Garden Collection Management

Introduction

IrisBG is a complete botanical collection management database and software solution for botanical gardens, arboreta and large estates.

The product

IrisBG comes as a standard package with a set of optional modules. This will enable you to choose the configuration that is suitable to your requirements and budget.

The "Standard Package" manages a comprehensive set of botanical collection data, including plant history and related information such as taxa with synonyms, authors, images, collectors, contacts, references, tasks, inspections etc.

Optional modules

Garden Explorer: Publish your plant collection on the web, which can be accessed from PC's, smartphones and tablet computers. QR code integration is available "out of the box".

IrisBG mobile: Update your plant collection, take photo's and update map coordinates out in the garden using a handheld device.

Mapping : Display and update map coordinates for your accessions, garden areas and the origin of your accessions. Use your own maps or choose between a wide range of internet map service providers, including Bing maps, OpenStreetmap, etc

Store Management: Prepare catalogues and handle orders on material (i.e. seeds, plants etc) you are offering.

*Index Seminum*: Publish your seed catalogue and receive your orders on the web.

Preserved Collection: Record all your preserved plant material alongside your living plant collection.

Data Import: Import data directly into IrisBG.

About us

IrisBG was introduced to the Scandinavian market in 1996 and the global market in 2007. IrisBG version 3, was launched in 2011 and is one of the most comprehensive software packages available for botanical collection management today.

The IrisBG team consists of people with an extensive knowledge of botany, as well as professional software engineering. We believe this is one of the key ingredients to creating a tool that is easy to use and can satisfy the most demanding requirements of the professional botanist.
